

Fitzroy Crossing BULL SALE

FITZROY CROSSING INVITATION
BOS INDICUS BULL SALE 2019

174 Specially Selected Bulls
Fitzroy Crossing Rodeo Grounds
FRIDAY, 23RD AUGUST 2019
Commencing at 10am

SELLING IN ORDER OF:

Red Brangus – 8

Red Brahms – 37

Grey Brahms – 46

Droughtmasters – 52

Queenslanders – 27

Charbrays – 4

LANDMARK
BROOME

Meet Martin. He's a good person to know for insurance.

Farm, business, home and car insurance specialist.

Insure with WFI and you'll deal directly with a local area manager who will take the time to understand you and your insurance needs. So, your insurance will always be handled with a personal touch.

Martin Ballinger | Mobile 0427 081 341

To see if our products are right for you, always read the PDS from the product issuer, Insurance Australia Limited ABN 11 000 016 722 AFSL 277681 trading as WFI (WFI).

Welcome

I would like to welcome both Vendors & Buyers to this years Fitzroy Crossing Bull Sale.

The sale continues to go from strength to strength - this is off the back of committed vendors supplying year in year out good quality functional bulls that are breed to succeed in pastoral conditions.

2019 has been a challenging season right across Northern Australia. Lack of rain over a large portion of the country has been the main catalyst in us reducing bull numbers for this years sale.

We are confident that there will be bulls at the sale that will suits everyone's budget & quality.

On behalf of myself & the Landmark Broome team I would like to wish all vendors & purchasers all the best for the sale & the rest of the season.

Merv Wortley
President Fitzroy Crossing Sale Committee
"Ruby Plains" Station, via Halls Creek.

Outside Agents

No rebate will be paid to outside agents.

Disclaimer

The information contained in this catalogue is believed to be correct at the time of going to print. All care has been taken in its preparation, however no responsibility is taken for any inadvertent error or omissions.

Inspection

Bulls will be penned by 7:00am on the day of the sale for inspection or by prior arrangement.

Refreshments

A complimentary Breakfast is provided commencing at 7:30 am on sale day. A luncheon and refreshments will be available for sale on the day.

Auction

All bulls will be sold under the Landmark Conditions of Auction Sales. The Auction Price will be GST exclusive.

Sperm Morphology

Morphology (anatomy) of the sperm has been shown to be one of the most important indicators of fertility in the bull and a very useful selection tool for improving herd fertility. Studies of Northern Australian herds, have demonstrated that in general bulls with (Less than symbol) 70% normal sperm (Fitzpatrick et al, Animal Reproduction Science 71 (39-49)

What is sperm morphology?

Sperm morphology refers to the shape, size and structure of the sperm. Sperm qualities and its ability to move forward and reach the egg (motility) is assessed crush side by the vet at the time of a bull test. A sample of the semen is placed into a small vial of preservative which kills, preserves and dilutes the sperm and other cells. The sample is later examined for morphology using a much higher power specialised microscope in a laboratory. The sperm are counted and 100 sperm are classes as either normal or abnormal sperm being categorised into differing abnormalities.

Why is sperm morphology important?

Morphology results can predict the sperm's ability to get a calf and importantly can pick up defects which may initially start to fertilise the egg but then fail to result in an ongoing pregnancy. Normal morphology has been demonstrated to be heritable, relatively repeatable (doesn't change much year to year), can be used to predict the number of calves the bull can produce and can even predict the fertility of his male and female offspring. The heifer's age at puberty and her time between calving and cycling again, can also be influenced by the morphology of her sire. The selection of bulls with high normal sperm morphology counts results in increased calving rates, tighter calving periods, reduced empty cows, increased weaning weights and faster rates of genetic gain. The stocking rate of bulls to females may also be lowered.

Bulls which do not qualify by morphology standards may still result in a large number of calves on the ground, but these calves may have come at a high cost. There may be an unacceptable high rate of empty or dry cows, and the cows may have lost one or two embryos during the mating season prior to maintaining pregnancy. The delays in achieving pregnancy result in smaller calves at weaning, and increased pressure on the cow to achieve pregnancy the following year as she has a shortened recovery time post calving.

What about variations in sperm morphology results?

Semen is sensitive to extreme temperatures, stress and diet, so morphology results can also reflect recent illnesses, transport stress, lameness and high grain diets, all of which may have temporary or permanent effect on fertility. As a result, repeat tests may be required on bulls with defects on the initial exam. Some bulls are more sensitive to these stressors than others and their morphology and fertility can be affected more easily than others in the same mob exposed to the same stressors. Overall, morphology in mature bulls is largely repeatable, so the majority of bulls will have similar results on repeat exam.

What about young bulls?

Young bulls may occasionally have defective sperm which reflect their sexual immaturity. In this case, the defective sperm count often progress to become normal as the bull matures sexually. Part of the testicle responsible for making important changes to the sperm necessary for fertilisation, may not mature to function effectively until some bulls are 15 months old. When it is not yet functionally normal, proximal droplets and other defects are seen on the sperm. Sperm with these droplets fail to bind to the egg. These defects should be diminished by 18 months of age or may reflect a slower maturing bull or another reason that their testicles aren't functioning properly.

How can producers benefit from morphology testing?

Only purchase bulls that have passed a morphology test. Ask to see the actual morphology test results and select bulls with higher percentage normal. Bulls which fail to be sellable at the morphology stage are an expense to the breeder, but the benefits of this step to the purchaser are considerable for their production and herd fertility. Breeders selling morphology tested bulls should be proud of their high standards which will be reflected in the long term quality of their product and in their reputation. Breed sales requiring morphology (more than symbol please) 50% higher standards than other sales. Retesting of some non-qualifying bulls may indicate the bull later improves to a satisfactory standard. Due to bull age and time limitations of some sales this retesting may impractical and bull may be withdrawn on the basis of initial test.

Vendors Fitzroy Bull Sale 2019

Redline Brangus

Quality Red Beef

Redline Brangus is located 180km west of Bundaberg, Central Queensland.

At Redline we sell approximately 130 bulls annually.

A small percentage of our seed stock are prepared for sales. This year we are offering 8 sires at the Fitzroy Crossing on 23rd August, 6 sires at the Monto All-Breed Bull Sale on 14th September and 12 stud sires at the Classic Red Brangus Sale CQLX Gracemere 24th September. These young bulls selected for sales, we place special emphasis on temperament, growth and over-all type.

All sale bulls are prepared in a grazing paddock where they have access to silage and are hand feed a small amount of bull maintenance pellets. Redline provides well covered bulls that are not over done.

Sale bulls are assessed for motility and morphology prior to sale. These bulls are also polled/horned through Genomics. Scanning results showing EMA, Rib, P8 & IMF will be available on our website and supplementary sheet. Sale bulls are constantly handled with horses, bike and worked through our yards, providing buyers with well mannered bulls that would suit any operation.

Redline has imported genetics from MLS Cortez into Australia through an exclusive partnership with Texas-based Trio Cattle and Genetics and MLS La Victoria. Cortez 175C6 has been used in an AI program with our females calving in September this year. Hopefully Redline will be cataloguing the first of his progeny in 2021.

A large percentage of our seed stock is sold directly from the paddock. Like our sale bulls, our paddock bulls are selected on temperament, growth and over-all type.

Redline guarantees our bulls for fertility. Property inspection of our seed stock is always welcome.

Kind Regards

Peter, Kristine, Kris and Donna Dingle

Redline Brangus are pleased to announce an Exclusive Genetic Partnership with TRIO Cattle & Genetics and MLS La Victoria.

PURCHASER..... \$											

The purchase of Cherokee Ole Shannon and various cows from Avondale, Brahmleigh and Hillview Studs was the beginning of Rodlyn Brahman Stud, established by Rodney and Lyn Sperling in the mid 1970's. We source our sires to produce good temperament, fertility and beef.

"BRED FOR BEEF NOT FED FOR BEEF"

Currently our breeder numbers are 10 Charbrays, 50 Droughtmasters, and 100 Brahmans.

The Charbrays are bred using pure bred Charolais bulls from Moongool, Gunnadoo over pure bred Rodlyn Brahman cows.

Our E.T. programmes are always on the go in order to try new sires.

We sell at Rockhampton, Roma, Blackall and Fitzroy Crossing sales.

We always have bulls and females for paddock sale and buyers are always welcome.

RED BRAHMAN

Having been in the Brahman industry for 35 years, Len and Peter Gibbs have now established a red Brahman herd with consistently sound structure, reliable temperament and fertility. A high number of progeny are polled.

Australian, South African and American genetics are carefully selected for IVF programs to continue to produce the attributes we deem necessary in the industry.

In 2018 Muan again sold the top priced red bull at Rockhampton Brahman Week sale – Muan Sundown (Sire – SRS Troubador) for \$95,000 to Samari Plains.

Our team for Fitzroy this year have been selected to perform in all conditions, having been prepared in the paddock with a silage ration. Paddock sales are always available & visitors are always welcome.

SAMARI PLAINS

Samari Red Brahms joined Australian Brahman Breeders Association in 1986. Samari is located 120kms south of Roma in South West Queensland. We had been breeding red Brahms for many years prior to this and the tradition continues with the original Samari brand being joined by Samari S.

We chose to upgrade our original females through the appendix rather than buy in outside stud cows. We have always, exclusively bred red Brahms and have only bought polled bulls for the last 5 years as we have more demand for them.

Our current sires are:

- Wattaview Galaxy (p)
- Fern Hills B Romeo (p)
- Fern Hills Romero (p)
- Samari Plains Nelson (p)
- Muan A Sundown (p)
- Samari Plains Boy George (p)

We aim for quiet temperament, fertility, constitution, sound udders, tidy underlines and overall high yielding beef attributes.

We now have many genomic tested predominately polled females in our herd and an increasing amount of PP bulls for sale.

The Samari herd are reared with what the season offers and bulls are only fed prior to sale.

We have run an AI programme for the last two years and depending on the seasons we will continue to do so. We are always looking down other avenues to keep up with technology.

We strive to achieve a high quality animal for sale which will improve any herd they are to be placed into.

Enquiries and visitors are always welcome at Samari.

BARLYNE

Barlyne has been focusing on supplying bulls to Western Australia since 1998, we base our breeding objectives and selection criteria on what we believe is required to perform well in the pastoral regions of WA. We concentrate on the need to produce bulls of sound temperament that are going to be able to perform in pastoral conditions. A large proportion of our breeding herd is now polled and we will continue to develop these genetics.

Regards
Jim & Johnny Edwards

A. AHERN BRAHMAN

Ahern Brahman is a family owned business in the North Burnett Region of Queensland.

This year we are offering 15 grey Brahman bulls at the Fitzroy Crossing sale in August.

We select cattle for Fertility, Growth Rate, Temperament, Bone, Structure and Correctness.

Our search for quality is ongoing. Enquiries are welcome at any time as well as on property inspections.

Two Sires we will be using in our 2019 IVF programs, Willtony Blundstone 1013 (POLLED) WRM1013M & JDH Sir Jacob Manso 678/8 JDH678/8M

BAR BOOT BRAHMAN

The Castle Family is based in South East Queensland, breeding bulls for the Kimberley market. Our focus is to breed bulls that exceed growth, fertility and temperament expectations as well as being highly suited to the climate. 2019

has proven to be a tough year for all, following a patchy year in 2018, we have yet to see significant rainfall. Although the year has been challenging, we have persevered and faced the challenges head on, delivering an excellent line of bulls.

This year we are offering a great selection of bulls from Stewart Park Kody and are also excited to showcase our first Yenda V El Chappo bulls. We have been pleased

with all his progeny, heifers and bulls alike, for their temperament, growth and consistency.

CastleLivestock extends our gratitude to all our clients who continue to support us, not only in the Sale but all those who purchased paddock bulls throughout the year. We have a great range of paddock bulls available at home ready to go; feel free to contact us for any enquires.

BAR BOOT BRAHMAN – Darren & Jacqui Castle; 0741644487 or 0419832094
Tony & Yo Castle; 0427676661 or 0417761162

RAGLAN BRAHMAN

A1.

The stud was registered in 1994 to Andrew & Roxanne. When they married in 1985 it united the Beak/Olive family from Marlborough with the Kirk family from Yenda, Gayndah. These two original families began breeding Brahman in the early 1950's, which gave Raglan Brahman a knowledge and history of breeding Brahman cattle from strong genetic bloodlines.

With the strength of these genetics and the quality of the cattle joined together from the original studs and the knowledge we have gained over the years from showing cattle, Raglan has fast become a well known identity of its own.

Raglan is an intensive bull producing business, through the use of genetic bloodlines, AI and IVF programmes, we continually strive to produce an animal that meets all market requirements.

We are AQIS accredited with semen and embryos available for overseas programmes.

We market our bulls via a number of auctions, these include Rockhampton Brahman Week, All Breeds Summer Sale, Ponderosa Sale in the N.T. and in Charters Towers the Wilangi and Big Country sales.

Raglan sell both registered and commercial bulls & females to overseas clients from various countries, including semen packages and embryos from our registered Raglan Sires.

We continue to support Northern Australia by bringing our sale team to the Ponderosa sale in Katherine, for the last 30 years.

The majority of the operation's high quality bull sales are to long time valued repeat clients. Raglan bulls are always available for inspection and sale.

We invite you to visit our operation and inspect the raglan herd we are proud of. We hope we can work with you to meet all your breeding requirements.

ANDREW & ROXANNE OLIVE & FAMILY "Raglan Station" Raglan QLD 4697

SC Droughtmasters are located 1 hour North of Rockhampton on the Fitzroy River. Cattle are bred on coastal country with a strong emphasis placed on fertility and genetics with moderate maturity, quite temperament and structurally correct. Females are expected to calve annually, during a four-month joining period and are recorded on Droughtmaster Group Breedplan.

9 bulls will lead this years' sale team, with all bulls being polled, structurally correct, good sheaths and docile temperaments. 7 of the bulls will be sure to attract plenty of attention, by our leading sire Lisgar Dallas (PP). Dallas has very good growth, carcase

and fertility EBV's and is throwing consistently poll progeny with great breed characteristics. The remaining 2 bulls are by our own bred sire SC 538 who produced well muscled, long, structurally correct carcasses. All bulls have full EBV data and are semen morphology tested.

For full details please visit our website www.scdroughtmasters.com.au

We look forward to catching up at this years' 2019 Fitzroy Bull Sale and please feel free to visit if ever in QLD. Take care.

Valera Vale

DROUGHTMASTERS

Valera Vale's 2019 Fitzroy Crossing Draft

Valera Vale is a commercially focused enterprise marketing over 500 no nonsense herd bulls annually. Our aim is to breed functional, environmentally adapted cattle that can not only grow fat in the good seasons but survive and reproduce in the all too frequent droughts. We are based on a number of properties throughout Southern Qld ranging from ticky coastal forest country to Buffel grass pastures in arid outback Qld. Our main property is located at Charleville in the South West Qld region known as heart break corner.

Aside from the obvious non-negotiable standards of structural soundness and temperament we focus almost entirely on putting selection pressure on our herd for fertility. We have followed this track for 40 years. Our theory is that only sound adapted cattle can thrive in our environment enough to conceive and rear a calf annually through floods and droughts. We view the hard times as an opportunity to further advance our herd and make no excuses for the

animals that fail. The result is a high Brahman content herd with growth rates and reproductive rates well above breed standards and suited to diverse markets and conditions – a combination of *Bos indicus* adaptation with meat quality, poll genetics, reliable temperament and high fertility.

In addition to being morphology tested our 2019 draft is tested clear of Pompey and Pestivirus diseases, as well as being DNA sire identified, and poll gene and Brahman content DNA verified. The Valera Vale herd is one of the herds being used for Genomics research by the University of Qld, with the younger breeders being DNA analysed and reproductive performance recorded to identify the gene sequences associated with hard to measure but economically important traits, facilitating the development of EBVs based on genetic analysis. The experienced researchers involved have been very impressed at the ability of the Valera Vale females to cycle in very adverse conditions.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
- (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.
- (d) **Competition and Consumer Act (Cth) 2010**

It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:

- i. price-fixing; or
- ii. restricting outputs in the production and supply chain; or
- iii. allocating customers, suppliers or territories; or
- iv. bid-rigging; or
- v. collusive bidding.

Large fines and other sanctions may be imposed for unlawful conduct.

2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.

(b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.

3. The following applies in interpreting these terms and conditions:

- (a) The following words have the following meanings:

Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;

Livestock means animals auctioned pursuant to these terms and conditions; and

Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions

- (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and

- (ii) plus any GST added in accordance with clause 12,

- (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.

5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.

6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.

7. Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.

8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.

9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.

10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.

11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:

- (a) the purchaser's name; or
- (b) the bid card number which identifies the purchaser; or
- (c) the name of the person on whose behalf the successful bid was made; and
- (d) the Property Identification Code (known as the "PIC") of destination.

12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.

13. The vendor warrants;

- (a) That the vendor has (or will have) the right to sell the livestock at the time of delivery; and
- (b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.

14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.

15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.

16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.

17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.

- (b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.

- (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.

18. (a) Subject to this clause the sale is complete on the fall of the hammer.

- (b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:

- (i) delivery is taken by a representative of the buyer;
- (ii) departure of the animal from the purchaser's delivery pen; or
- (iii) one hour after the last animal is:

- a. in the case of pre-sale weighing, sold; or
- b. in the case of post-sale weighing, weighed.

- (c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.

- (d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.

- (e) This subclause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This

subclause does not apply if the agent makes an announcement to that effect prior to sale.

19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.

- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.

- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.

- (d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.

- (e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLIS information is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.

- (f) Where livestock have a food safety or market eligibility status derived from the National Vendor Declaration (NVD) and/or the NLIS/ERP database, the agent will inform the buyers by pre-sale catalogue and/or announce the status prior to the offering of those lots.

20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:

- (a) does not acquire title to the livestock;
- (b) holds the livestock as bailee only for the vendor;
- (c) must act in a fiduciary capacity in its relationship with the vendor;
- (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
- (e) is responsible for the safety and well being of the livestock;
- (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
- (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.

21. The purchaser agrees that:

- (a) Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
- (b) The purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 25 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
- (c) the Livestock are collateral for the purposes of the PPSA;
- (d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
- (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract

22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.

- 23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.

- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.

- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.

- 23.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:

- (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
- (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.

- 23.5. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).

- 23.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:

- (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
- (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.

- 23.7. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.

- 23.8. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:

- (a) by this clause 23, other than as it expressly provides; or
- (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.

- 23.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim or deduction, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer, as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.

24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.

- (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
- (c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.

25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of

engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.

- (b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:

- (a) pass government and other regulatory authority requirements and inspections at the time of slaughter;
- (b) are of merchantable quality;
- (c) carry an NLIS device in accordance with State law;
- (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will fit for the particular purpose or market; and
- (e) all information in any document provided by the vendor is true, complete and correct in all material respects.

28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.

29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.

30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.

31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:

- (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
- (b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.

32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:

- (a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
- (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
- (c) any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.

35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.

36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:

- (a) a certificate is issued by government which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
- (b) the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day after the fall of the hammer; and
- (c) if the condemnation is due to chemical residue the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.

37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

NSW Property, Stock and Business Agents Act 2002 Warnings

Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (i) to abstain from bidding; or
- (ii) to bid to a limited extent only; or
- (iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer directed and precisely announces that fact prior to the sale.

Tasmania Legislation. An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

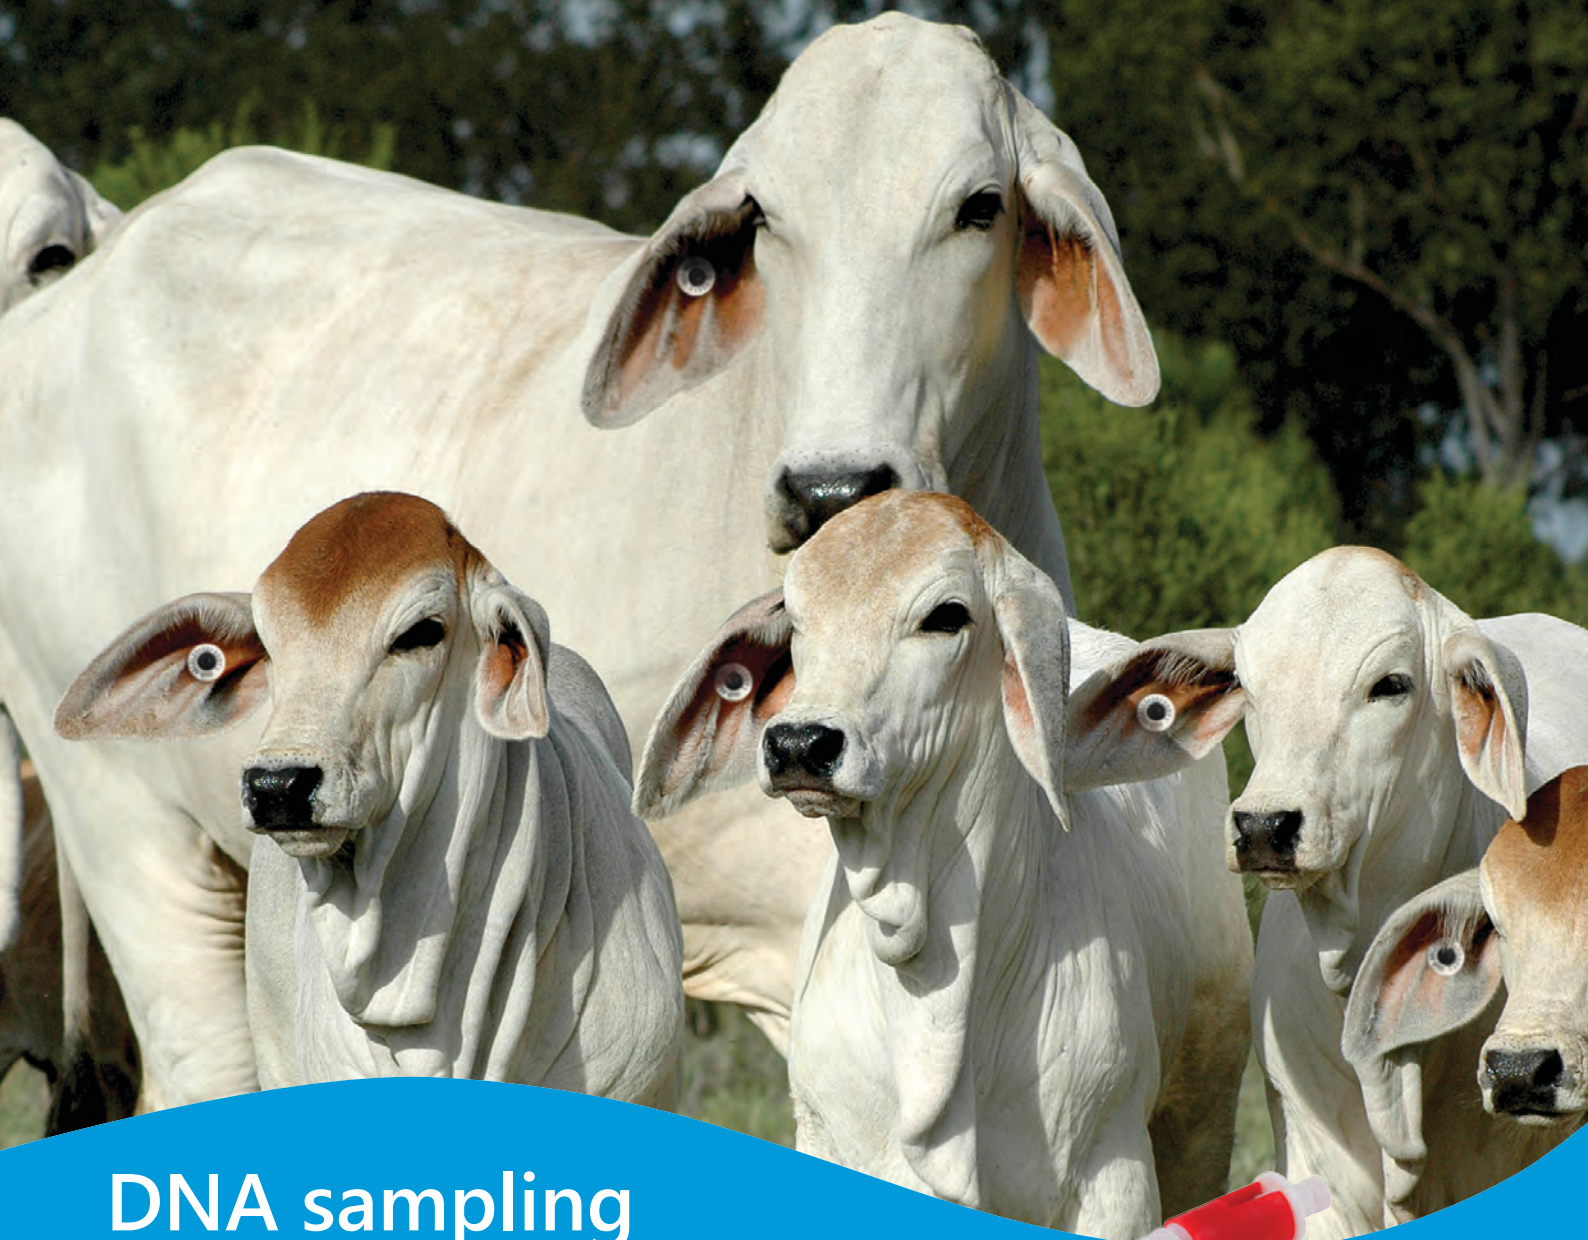

WA Auction Sales Act 1973 s31 NOTICE

It is an offence to:

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise;
- (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.

Identify, trace, record.

DNA sampling with tissue sampling units (TSU)

- ✓ Fast, high performance sample collection
- ✓ Clean, uncontaminated sampling
- ✓ Minimise retesting
- ✓ Sample integrity

Livestock Intelligence

PGA Brahman - Week Scholarship

Report by 2018 winners

After a 5 hr flight, CJ and I landed in Brisbane and were greeted by Mr Michael Flynn of Valera Vale Droughtmaster Stud. Mr Flynn then took us onto his residence at Peak Crossing. Luckily we were able to catch a few necessary hours of sleep before we embarked on our next journey.

Once refreshed Michael chauffeured CJ and Myself to the University of Queensland's Neogen Lab, here we were given an insight into the scientific side of producing quality cattle. It was remarkable to see how a laboratory that started off servicing beef cattle section of the livestock industry of Australia, now services a much larger variety, e.g. companion animals, dairy cattle, sheep and goats along with pigs. With today's technology scientists and students are able to determine various factors and attributes associated with producing quality animals big or small. We were lucky enough to witness a few of their state of the art machines in action and also some of their team preparing hair DNA samples for testing.

Day two was a jam packed day, full of meat and guts; well the second half was anyway. JBS meatworks in Dinmore are the largest meatworks in the southern hemisphere. Situated on 106 hectares of river front land, JBS occupy an abattoir, a water treatment plant, feedlot and also a hide treatment plant. CJ and I were included in a 5hr tour of every nook and cranny that the 106 hectares has to offer, we witnessed trucks being loaded, cattle being prepared for slaughter and the entire process in between.

After two days of informative learning CJ and Myself packed our bags, said our goodbyes to the Flynn Family and Co, we were set for six days with the Gibbs and none other than the Edwards boys.

Michael Flynn was kind enough to drive us on the 4 ½ hr journey to Muan Brahman Stud in Biggenden. There, we were introduced to Neil Gibbs of Nicneil Brahmans. After helping with the preparation of a few sale bulls, we were introduced to Johnny Edwards of Barlyne Brahmans in Gayndah, we said our goodbyes and thanked Michael for his hospitality and were off on our next adventure. Destination no 2 for the day was Barlyne Stud. We were able to settle into our rooms and get a quick bite to eat before we hiked into town to witness the weekly local game of golf.

Under the watchful eye of Jimmy Edwards we were set off to see Lenny Gibbs and Co for the day and be put to work. Muan Stud is the resting spot for other vendors on their way to the Rocky sale and also the place of preparation. Bulls are fed for 3-4 months in advance and painted 2-3 days prior to being moved to the sale venue, a bull of Lenny's that we painted on this day would later be sold for \$90,000 and the up and coming Rocky Beef Week. Once all the bulls had been painted we were off to see the feedlot owned and run by the Gibbs Family and also their abattoir Biggenden Meats. After an hr tour of the facility were on our way back to the stud to be introduced to some of Lenny's older herd bulls that now live in the yard beside the house. Once various stories had been told we were back in the car and destined for Barlyne.

A new day saw us helping out the Edwards family to vaccinate and record a few of their up and coming weaner bulls of the Barlyne range. Johnny saw fit that once we had finished needling their progeny we were to be taken on an exclusive tour of the stud by the man himself, of course while assisting him with calf records. While bouncing around

the hills of Gayndah in their high class Daihatsu we experience first handed how calf birth dates were noted, we were also able to view their breeding herd from a distance. As evening came around we putted home to pack our bags and prepare for tomorrows 4 hr journey to Rockhampton.

The trip to Rockhampton was surprisingly intervened with a quick stop at the Mundubbera Berry Farm and with a thorough escorted tour from Miss Sally Jolly, a carton of blueberries on our lap we were set for the rest of the journey.

Rockhampton greeted us with many friendly faces and many more familiar stud names than expected. Johnny introduced us to many stud owners while we walked the pens of the bulls that were to be marched through the ring over the next few days to be sold.

To break up the three day sale week we took a trip out to the 'Rocky Repro' centre with Steve Farmer of SC Droughtmasters, while visiting we were lucky enough to witness a few top priced bulls (sold the day before at the Brahman Week Sales) have semen extracted. CJ and I were then allowed to follow the samples through the lab and also take a look at how the samples were viewed under the microscopes used and were included in the diagnosis of these samples. After viewing the Rocky Repro to its full extent and finishing with the storage of semen, we piled back into Steve's car and drove out to his home and stud at Canoona, 'Mt Elsa' or otherwise known as SC Droughtmasters. Steve took us on a tour of the property enlightening us with his diverse breeding program and how he was implementing different methods to allow him to stay on top with the drought pressing hard. Mr Farmer was using irrigation from the Fitzroy

River to sustain healthy pastures and allow for his meat cattle and young stud cattle to grow to their full potential. After the tour and many a discussion and of course being introduced to the family we were set to return to the busy scene of the sale once again.

With the commencement of the sale week we said goodbye to our guide, Johnny, and thanked him for his hospitality and insight into the exciting world of Brahman Stud Cattle. We enjoyed our last meal with the Gibbs Family and were in for an early night with an early flight the next day. On behalf of CJ and myself we would like to say a huge thank you to everyone that entertained our questions and chauffeured us through this fast growing society. We would like to thank the organisers of the Fitzroy Crossing Bull Sale who ensure that this trip runs as smoothly as possible.

Lauren Elmes
Sophie Downs, Halls Creek

First and foremost I would like to thank the committee for the wonderful opportunity they afford me in the form of this trip. I found

the whole experience to be a well-planned and organised experience.

The information and knowledge that was made available to me was an eye opener but something that I totally appreciated and as time goes by I'm sure that I will come back to the things that I have learnt throughout my career.

The genetics lab in Gatton was very informative and opened a whole other side of our industry. It was a lot to take in at once but when you go away and think about the application of this research is far reaching.

Dinmore meatworks was something that I enjoyed and made the scope of the industry even more evident in the diverse roles contained within the industry. We tend to start thinking that what we do is it but the industry is so much more and so diverse.

The trips to three successful and very different studs made me aware that there is no one way to do things every place had a different philosophy and approach to the business but all worked for them. The different scope of skills and knowledge I witnessed has given me plenty to

think about. Across the board the level of professionalism within the industry is very encouraging and makes you proud to be part of an industry that is so diverse and forward thinking.

Rocky Repro made me think about the implications of 'playing god' with genetics and the consequence in the long term for the future of the cattle industry in Australia.

I have made contacts that will stand me in very good stead in the future and maybe open doors later to move into other areas of our industry.

This scholarship is a wonderful opportunity and something that I hope continues into the future so other young cattleman or women can access the knowledge that has been afforded to me.

I'd like to thank the committee, the group of people in Queensland whom opened their homes and businesses up for me.
